

Generating SDRs in TestHound

1. Log In:

- Access your account on **Test Hound**.

2. Navigate to Performance Tracker:

- Select **Performance Tracker** from the main menu.

Select	002	295481	ANGELES, DARIORENE	M	12	☐	☐

3. Generate SDRs:

- Choose **Generate SDRs** from the available options.

4. Select Student Options:

- Check the **Flagged Students** option.
- Select the boxes for students in grades **3 through 12**.

Generate SDR File

Hey, you want a Student Data Request file? Well, we might give you two. First, select at least one method and grades than Next, click the 'Generate' button. It will download a pre-formatted SDR file, as well as a file which contains any student that we cannot associate to a TSDS ID, or don't have a valid date of birth.

Method: Only flagged students

Grades:

- ☒ Eighth Grade
- ☒ Seventh Grade
- ☒ Sixth Grade
- ☒ Fifth Grade
- ☒ Fourth Grade
- ☒ Third Grade
- ☐ Second Grade
- ☐ First Grade
- ☐ Kindergarten

Generate Cancel

5. Generate and Download:

- Click **Generate** to create the SDR file.
- Once the file is ready, download it in **.csv** format to your computer.

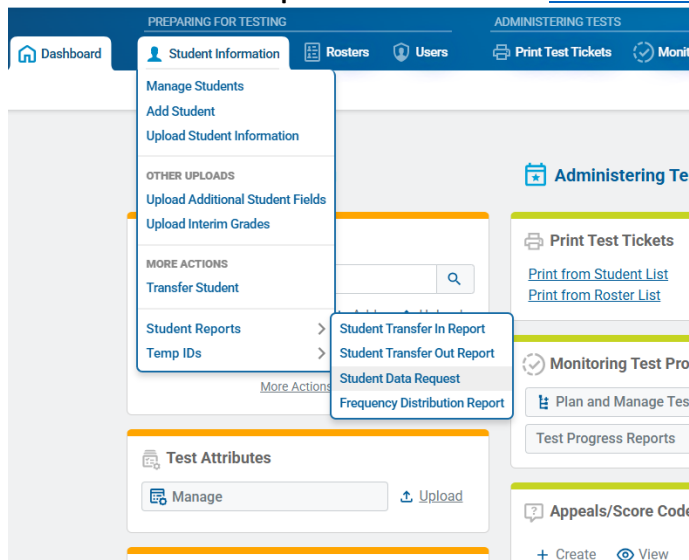

Populating the SDRs

Step 1: Log In

1. Log in to **TexasAssessment.gov**.

Step 2: Access Student Data Request

1. Navigate to the **Student Information** section.
2. Select **Student Data Request** from the menu. – [SDR instructions](#)

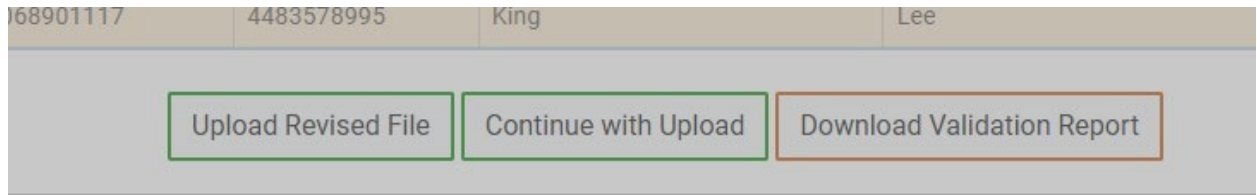

Step 3: Upload the File

1. Upload the SDR file you generated earlier.

Step 4: Validate the File

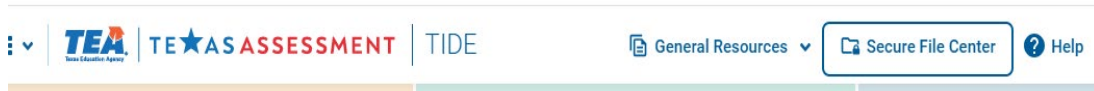

1. Once uploaded, the **Validate** page will display any issues with the file:
 - **Errors:** Rows with errors will be excluded from the upload, but the rest of the file will be processed.
 - **Warnings:** Rows with warnings will be included in the upload, but the field marked as invalid may affect data quality.
2. Choose one of the following actions based on the validation results:
 - **Continue with Upload:** Proceed with the upload despite errors or warnings. The file will be processed, and a confirmation page will appear once completed.
 - **Upload a Revised File:** If you want to correct the errors or warnings:
 1. Select **Upload Revised File**.
 2. Make the necessary corrections to the file.
 3. Re-upload the revised file for validation.

- Once validation is successful or you decide to proceed despite errors or warnings, select **Continue with Upload**. A confirmation page will indicate that your file has been successfully uploaded.

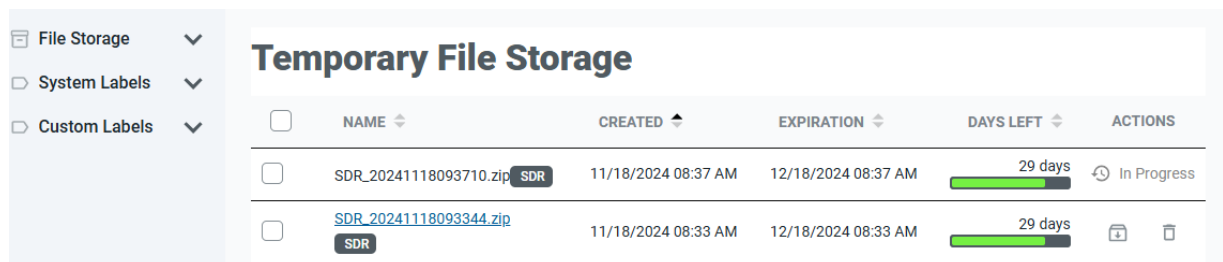

Step 5: Download the Processed File

- Navigate to the **Secure File Center** from the TIDE banner.

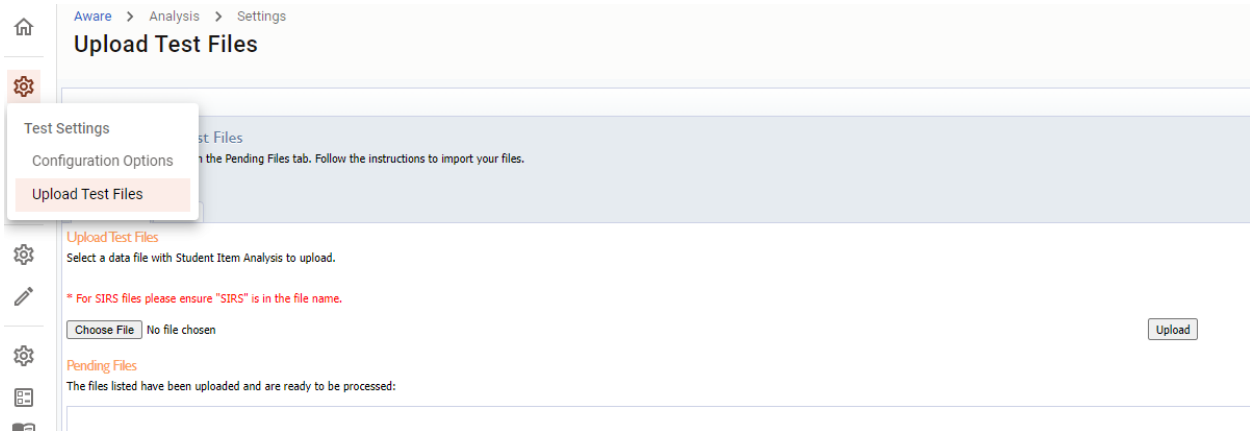

- Locate your file:
 - While processing, the file will appear in your inbox marked as **In Progress**.
 - Once processing is complete, the file will be available for download.
- (Optional) Use the keyword search or filters to locate your file more easily.
- Select the file name to download it. The file will be saved to your computer's default download location.

Uploading SDRs to Aware

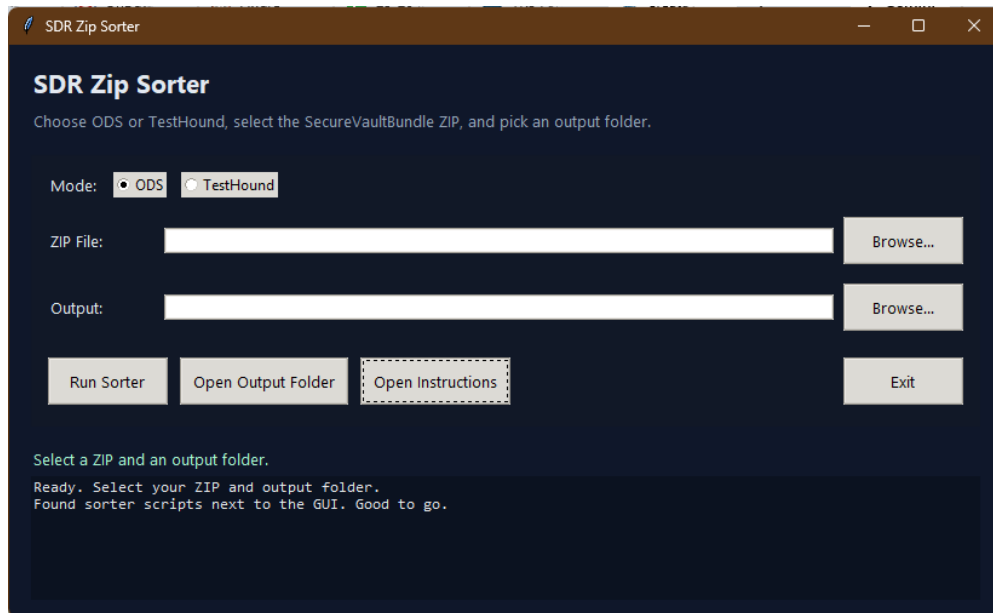

- Rename the File:**
 - Update the file name to include "SIRS" as part of the file name.
- Prepare the ZIP File (Optional):**
 - If uploading multiple files, create a ZIP file containing all the SDR files.
 - Ensure the ZIP file name also includes "SIRS".
- Upload the File:**
 - Log in to Aware.

- Upload the file or ZIP file as you normally would.

SDR File Sorter

The **Python File Sorter** consists of three Python scripts that must be located in the same directory. Follow these steps to use the sorter:

- 1. Prepare the ZIP File:**
 - Ensure you have downloaded the required ZIP file from TIDE.
- 2. Launch the File Sorter:**
 - Open the Python File Sorter GUI.
- 3. Select a ZIP File:**
 - Click **Select ZIP File** and choose the file you downloaded from TIDE.
- 4. Choose an Output Folder:**
 - Click **Select Output Directory** to specify where the sorted files will be saved.

5. **Choose Sorting Mode:**

- Select either:
 - **Test Hound Sort:** For files meant to be uploaded to Test Hound.
 - **ODS Sort:** For files categorized by STAAR, TELPAS, or other categories.

6. **Run the Sorter:**

- Click **Run Sorter** to begin the sorting process.
- The files will be sorted into the specified output folder, with unsorted files placed in an **Unsorted** folder. A text file listing unsorted files will also be generated.

Uploading SDRs to Test Hound

1. **Log In:**
 - Access your account on **Test Hound**.
2. **Navigate to Performance Tracker:**
 - Select **Performance Tracker** from the main menu.
3. **Upload Data:**
 - Click **Upload Data** to begin the upload process.

1 2 3 4 5 6 7 8 9 10 ...

4. **Select File Type:**
 - From the dropdown menu, choose the correct **file type** that matches the data and year of the SDR file you are uploading.
 - Double-check the file type and year to ensure accuracy.

Select

Preliminary CRS EOC
2023-Current 3-8 Data
2018-Current EOC Data
2021-2022 3-8 Data
2020 3-8 Data
2019 3-8 Data
2018 3-8 Data
2017 EOC Data
2017 3-8 Data
2016 EOC Data
2016 3-8 Data
2015 EOC Data
2015 3-8 Data
2014 EOC Data
2014 3-8 Data

5. **Upload Files:**
 - You can upload up to **10 files** at a time.
 - Select the files and proceed with the upload process.

Uploading SDRs to ODS

1. *Categorize SDR Files:*

- Ensure that all SDR files are separated into the correct **category type** (e.g., STAAR EOC, TELPAS, TELPAS Alt).
- Organize files based on the required ODS categories before proceeding.

2. *Upload Files:*

- Navigate to the **File Upload Center** in ODS.
- Drag and drop the files into the appropriate upload area under the correct **file type category**.

SDR / SIRS

3. *Follow ODS Instructions:*

- Refer to the specific **instructions provided by ODS** for file naming conventions, upload limits, and any additional requirements.

4. *Confirm Upload:*

- Verify that all files have been uploaded successfully and are visible under the correct categories.

Follow the instructions provided from ODS:

Loading Cambium Student Data Retrieval (SDR) OR Pearson Student Information Retrieval System (SIRS) files

SDR (Cambium) / SIRS (Pearson) – Accepted Data File Layout

SDR This file is a text file (.TXT)

SIRS This file can be a .DAT or .TXT depending on year

File cannot be compressed or zipped

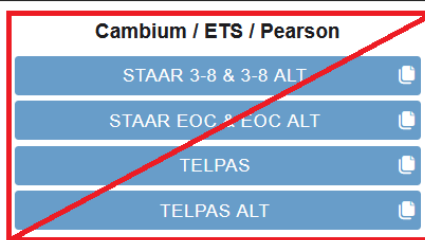

File name cannot contain spaces

When naming files, only use letters, numbers, dashes or underscores

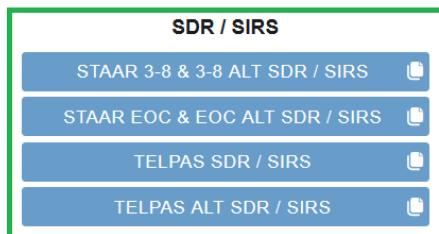

LOADING Cambium Student Data Request (SDR) OR Pearson Student Interchange Retrieval System (SIRS) Files

SDR / SIRS files should only ever be loaded into the SDR/SIRS file center location.

Important Note: Do NOT load SDR/SIRS files into the "Cambium / ETS / Pearson" file center section. If you accidentally load an SDR or SIRS file into the Cambium/ETS/Pearson file center location, please delete, and then reupload the file into the SDR/SIRS location. For details on how to delete a file please visit the supporting '[File Delete](#)' knowledge base article:

Do not load SDR / SIRS files into the Cambium / ETS / Pearson file center location

Only load SDR/SIRS files into the SDR /SIRS file center location.

Example SDR file naming conventions

SDR files originating from Cambium will have the following naming convention:

Grade 3-8 Example 0523_G07_ProductionExaminee_20230728161154_Final_V01.txt

EOC Example

1623_E2_ProductionExaminee_20230808101959_Final_V01.txt

TELPAS Example SF_0323_TELPAS_K_ProductionExaminee_2023009120129_V02.txt

Loading State Assessment Files – Step-by-Step

For step-by-step details on how to load assessment files please visit the KB article below
